tomoDD · shared velocity model · depth $Z = 1.5$ km
All inversions: iteration 3, hypocentres free

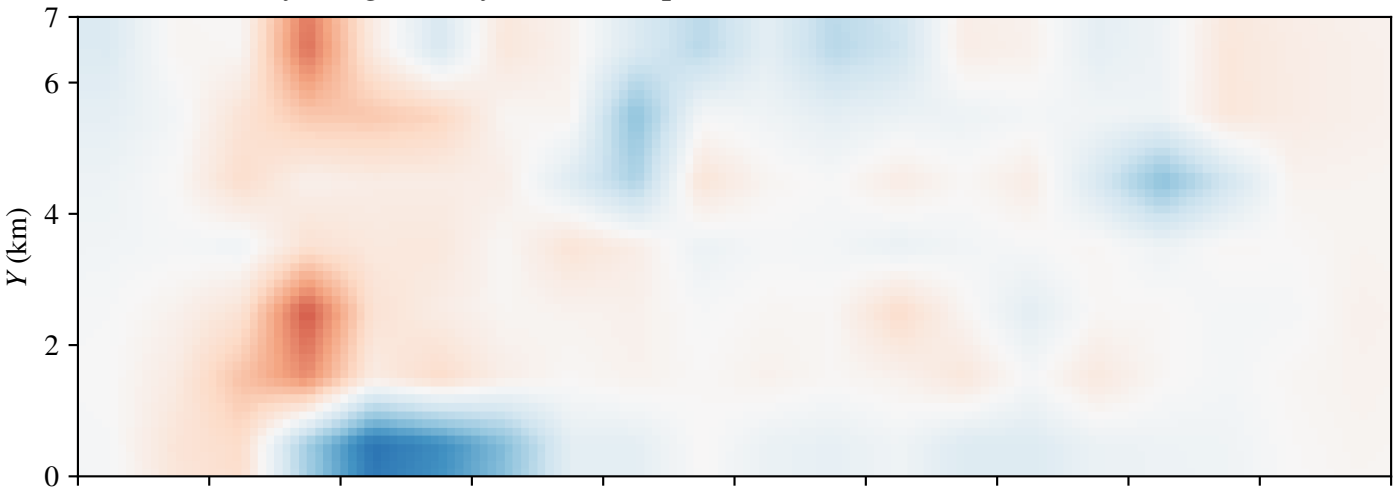

tomoDD oracle: native trilinear representation | slice RMSE 184.0 m/s

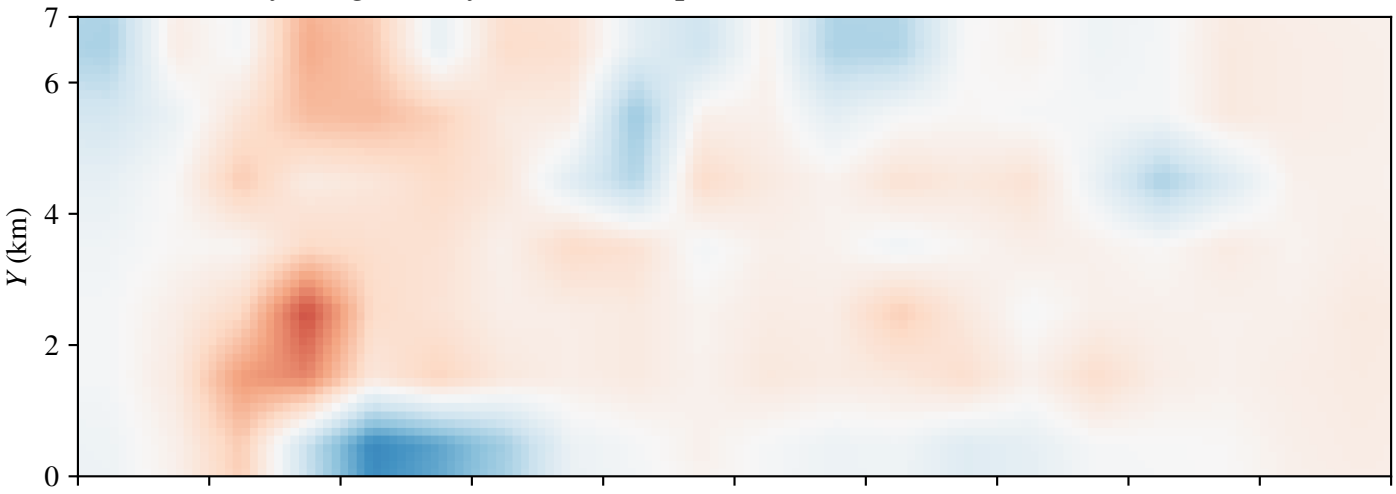

Artificial geometry: $\sigma_0 = 1$ km per coordinate | slice RMSE 144.6 m/s

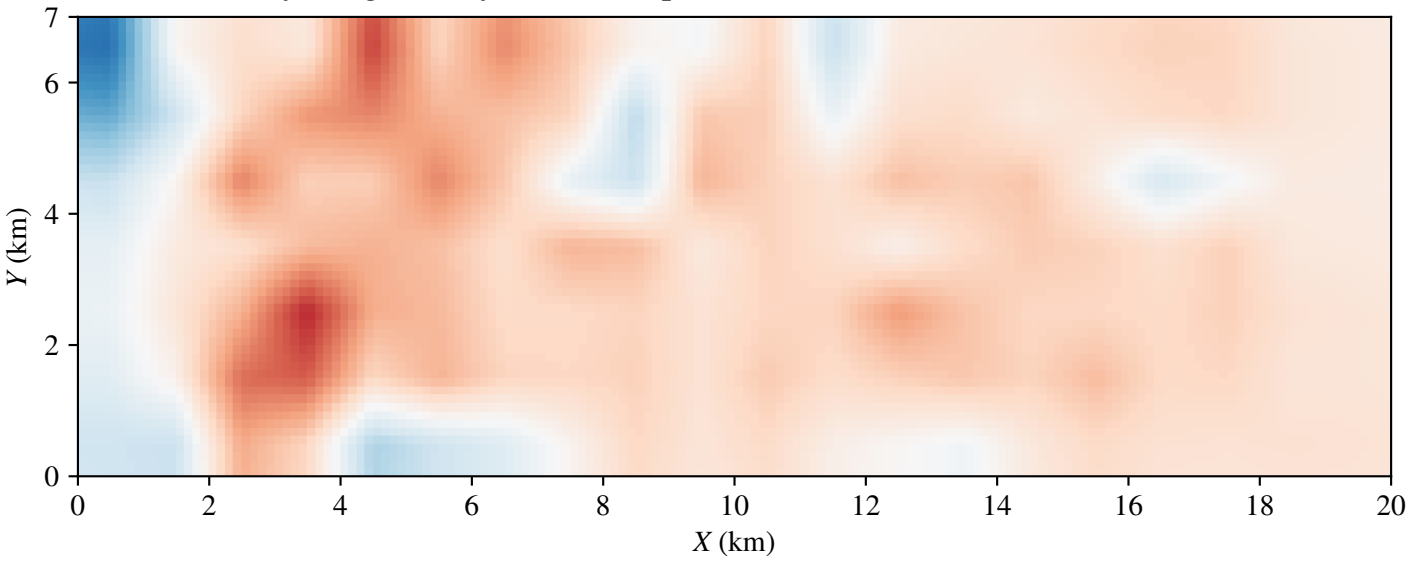

Geysers geometry: $\sigma_0 = 0$ km per coordinate | slice RMSE 181.1 m/s

Geysers geometry: $\sigma_0 = 0.5$ km per coordinate | slice RMSE 211.0 m/s

Geysers geometry: $\sigma_0 = 1$ km per coordinate | slice RMSE 338.9 m/s

Native trilinear fields. No extra smoothing.
