
Geysers acquisition geometry · tomoDD · depth $Z = 1.5$ km
Iteration 3 in every panel; hypocentres free during inversion
True initial hypocentres: $\sigma_0 = 0$ km per coordinate | slice RMSE 181.1 m/s
Perturbed initial hypocentres: $\sigma_0 = 0.5$ km per coordinate | slice RMSE 211.0 m/s
Perturbed initial hypocentres: $\sigma_0 = 1$ km per coordinate | slice RMSE 338.9 m/s
